

CENTRAL ELECTRIC COOPERATIVE, INC.

JOB POSTING

New Job Opening Announcement

Date: July 7, 2020
Position: Distribution Engineer
Department: Operations and Engineering
Starting Date: August 17, 2020
Salary: Commensurate with experience and abilities

Requirements: Responsible for new design, maintenance and integrity of electrical system in a specific geographical area of CEC service territory. Ability to work independently and across all departments to ensure efficient and timely job progression and completion.

ESSENTIAL DUTIES AND RESPONSIBILITIES:

- Demonstrate practical and detailed knowledge of CEC construction specifications, NESC code, rate schedules and customer service policy
- Apply CEC standards and construction methods to design electrical distribution system improvements, upgrades, modifications and new power line extensions
- Generate cost estimates and stake both overhead and underground distribution facilities prior to construction; create staking sheets and have familiarity with ESRI products
- Analyze customer problems and recommend appropriate corrective action to ensure cost-effective solutions as directed by the Supervisor of Engineering Services
- Knowledge of CEC trenching/separation requirements and division of CEC vs. Member responsibilities
- Demonstrate an awareness of maintenance and safety concerns within CEC electrical system and initiate corrective actions, including third party pole attachments and NESC violations
- Work with Land Use and Right of Way Specialist as needed in researching property ownership, reviewing legal descriptions and providing design alternatives to successfully obtain easements
- Attend training as directed by Supervisor of Engineering Services
- Support a culture of safety excellence through active involvement and promote a sense of shared responsibility for safety

QUALIFICATIONS:

- High school diploma or equivalent
- Ability to build and maintain strong working relations and communicate effectively
- Must be able to hold and retain a valid State of Oregon Driver's License
- Working knowledge of computers and Microsoft Office Suite
- Five (5) years of electrical utility work experience preferred
- Engineering degree or comparable experience and training or certification program preferred

Contact: Questions or interest: Send resume and application to Lisa Gwynn at lgwynn@cec.coop

Deadline: Close of business – July 24, 2020
